Ultimate lion simulator game

Simulation games are one of the most vast and popular game genres. It is also one of the most popular on mobile because tap and swipe controls translate well on the touch screen. They are easy to play with, fun to participate in, and some of them can last for years. Simulation games are very easy to explain. It is a game where things happen automatically and you push things together in a certain direction with your decisions. The idea is to imitate certain activities. The problem is the immensity of the simulation genre. You can simulate almost anything and therefore you have tons of sub-genres like Flying Sim, Life Sim, City Builder Sim, Survival Sim, Agricultural Sim, Sports Sim, and all sorts of other Sims. With so many choices across so many topics, it's hard to compile the best list. Nevertheless, I will try my best. Here is the best simulation game for Android! Check out more simulation games here: **ATL**Life**Price:** ATL**Life**text Style Life Simulator to play for free. It starts like most life simulators. You are born, you grow up, you make decisions about your life, and one day you die. The game allows you to make various decisions and track life statistics such as happiness, appearance, health, etc. This game allows you to make decisions and points from there. It's an early game with no graphic appeal at all. Those looking for something closer to The Sims can try Out The Sims: Mobile or The Sims: FreePlay, two relatively modern life simulation games. **Animal Crossing: Pocket Camp** Price: Free **Re-Animal Crossing: Pocket Camp** is a social simulator. It doesn't simulate anything in particular but people tend to agree that it does simulate things. While players fall on the island and are there, they make friends with local wildlife, build camps, explore the area, make things, and do more. The Nintendo Switch variant is much deeper, but the mobile version will scratch not only itch. The mobile version includes more than 1,000 households, 300 articles of clothing, and more than 100 animal friends. People love this one even if they do the game for free. **Escapist 2**Price: \$6.99 **Escape 2** Mix between strategy and simulation game. You live in prison and you can escape. Players go to the playground, eat food, and live prison life every day, including everything in that jazz. But in the background, they are secretly planning an escape. This game has various ways to escape from each one with a variety of prisons to escape. The first game in the series is still very good, but slightly less refined than the second. I honestly recommend one too. **Fallout Shelter** Price: Free **Play**Indefall dominated the headlines again when shelters came out in 2015. It's praised for its fun gameplay, classic fallout quirkiness, and excellent freemium strategy. In this one, you build fallout shelters and fill them with residents. Residents perform a variety of tasks A. They also interact with each other in a variety of interesting ways. You can also have a baby if you want. The idea is to create the best vaults ever, explore the wasteland and create a thriving community of living people. This is definitely one of the previous simulation games on the list, but it's still the best example of a particular play style within the genre so let's stay. There's very little to do, but it's really good at what it does. It is a flight simulator for drones. It supports both field of view and first-person view while flying and it gives the game an intense feel. **Players** can take off, fly, fly through small obstacle courses, and have some fun trucks. The game also supports hardware controllers. You need a more powerful phone to maintain a higher frame rate with high-resolution graphics, but you can always turn the graphics down to increase the frame rate. The developer also lists other players that are useful and useful. It runs for \$2.99 with no additional in-app purchases or ads. **PicaSim** is another great option for RC aircraft flight simulation. **Game Dev Tycoon** Price: \$4.99 **Game Dev Tycoon** is one of the new simulation games on mobile. It technically ports on your PC, but it doesn't get bad. You can start anything and slowly build a huge game studio. You try to sell the best games, make various decisions, improve your skills. It is one of the few game developer simulation games. However, this one seems to check all of the right boxes. It's also a rare paid game with no in-app purchases. The mobile version includes piracy mode, updated story lines, and touchscreen controls. The game also passes google play. If you use Kairossoft games you can play them for free **Price:** Free / **Varirossoft** is one of the obvious masters of the mobile simulation genre with developers on Google Play. The developer's portfolio is stacked with good titles, including **Grand Prix Story 2** (Racing Simulation), **Dream House Days** (Life Sim), **Ramen Sensi** and **Cafeteria Nittonica** (Cooking and Restaurant Sims), **Game Dev Story** (Game Developer Simulation), **Comic Works** (Publisher Sim), and at least a dozen others. Most of the games are premium and run for about \$5.49 while others can be played for free. Most of the games use the same retro style graphics and some similar mechanics, but you can't really go wrong with any of them. **Mini Metro** Price: \$0.99**Mini Metro** is a retro-style subway simulator. Players spend time designing subway maps for growing cities. You have to overcome various obstacles to make something smooth and running in time. The city you develop grows randomly because each game is different. In addition, the game includes various upgrades, endless modes to relax and cool down, and extreme modes for a few added challenges. Graphics have nothing to write about the house, but this graphic Excellent. It runs for \$0.99 with no in-app purchases or ads so it's also great for simulator fans on a budget. **Motorsport Manager Mobile 3**Price: \$3.99 **In-App Purchase** **Motorsport Manager Mobile 3** Racing Simulation. Players build racing teams, race cars and manage things like upgrades and improvements. Then you compete against the competition. Not just this, it's fairly granular. Players have to plant things like pit stops, weather changes, rule changes and random crashes on tracks. Drivers and crew also get levels and are more good at certain things than others. It is one of the deep racing simulations on Google Play and is also relatively new. It goes for \$3.99 as well with some optional in-app purchases. **Pocket City** Price: Free / \$3.99**Pocket City** is a city builder simulation similar to Sim City. Say it three times quickly. It has most of the dynamics of city builders. These include the actual construction of the city, the careful mix and matching of different types of buildings, and the ability to unlock new land when you go. These things also include fun like block parties, random events and things like weather disasters. It can be played in portrait or landscape mode and can also be played offline. The free version is the default game with ads. The premium version moves for \$3.99 and includes an add-on, sandbox mode, and it removes ads. This is easily one of the best city building simulation games on mobile. Those looking for something more classic can try **SimCity BuildIt**, but I think **Pocket City** is a better **SimCity** on mobile. **RFS - Real Flight Simulator** Price: \$0.99 **In-app Purchase****RFS** is a pretty good flight simulator for Android. It's also one of the deepest tones and tones a player can simulate. Some features include weather changes, day and night cycles, the ability to create complex flight plans, relatively advanced and realistic HUD, and other factors. The **Pro** version is expensive, but that's where things get interesting. It adds to multiplayer support (chat). However, it also allows you to drop on real flights happening around the world now and simulate their route to their destination. We thought it was a really cool feature. **Rebel Inc**Price: Free to play**Rebel Inc.** is one of the new simulation games. It's insanely popular by the same developers of **Plague Inc** and we recommend either one. **Rebel Inc.** has put you in the area with tons of anxiety. Your goal is to crush the rebels, bring peace to the region, and help the region grow and prosper. There are 7 areas to stabilize, and the game simulates all kinds of insurgency tactics you can deal with. Those who do not want to deal with terrorists can try **Epidemic Inc.**, which seeks to infect the entire planet with the virus. **Roller coaster mogul** price: \$5.99 **In-app purchase** and **roller coaster tycoon** is one of the great simulators in gaming history. This game gives you scenarios and **Park**. You can build a park in a way that meets the requirements of the scenario. Players can customize the rides, determine the layout of the park, and hire security guards and caretakers to keep the place and safe. The mobile version of the game comes with all the content from **Roller Coaster Tycoon** and **Roller Coaster Tycoon 2** with some optional DLC purchases to add 2 more. You can play the roller coaster tycoon's version for free in the **Play Store** with the second, but the classic version is much better. **Starde Valley** Price: \$6.99**Starde Valley** is a mix of different genres, including **RPG**, **Life Sim**, **Agricultural Simulation** and **Social Simulation**. Players fell on a devastated farm that must be restored throughout the game process. Nearby villages can be important others, and there are numerous mini-games and quests to keep things interesting. It's not as realistic as **The Giants Software's Agricultural Simulator 20**, but we think it's a little better rounded overall. The game runs for \$6.99 with no in-app purchases and you can play it for free if you use **Google Play Pass**.**Star Trader: Frontier** Price: \$6.99**Star Trader: Frontier** is technically a strategy game. However, because there are many simulation elements, we included them here. You are essentially simulating the career of a space resident. While you're allied with various factions or as an independent contractor, you're exploring new planets and new fields. The game is very deep and can be played in various ways. You can be a pirate, a military combatant, or just trade things if you want. It's a really fun world to be a part of with wide open. The game costs \$6.99, but there are no other in-app purchases or ads. If we missed some of the best simulation games for Android, tell us about them in the comments! You can also click here to check out our latest app and game list! **List**
